# Orchestra Max

— EMSculpt —

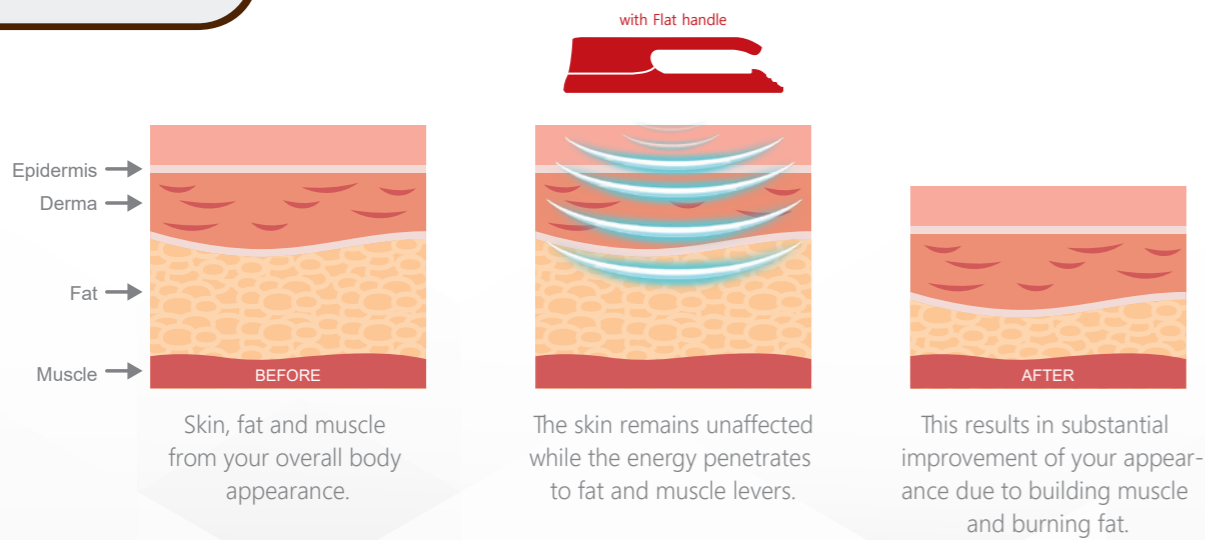

## How does it work?

Orchestra Max is a revolutionary, non-invasive body shaping therapy that works to build muscle and burn fat. Using high-intensity focused electromagnetic energy, Orchestra Max triggers supramaximal contractions that cannot be achieved by voluntary muscle contraction.

## Do Orchestra Max treatments hurt?

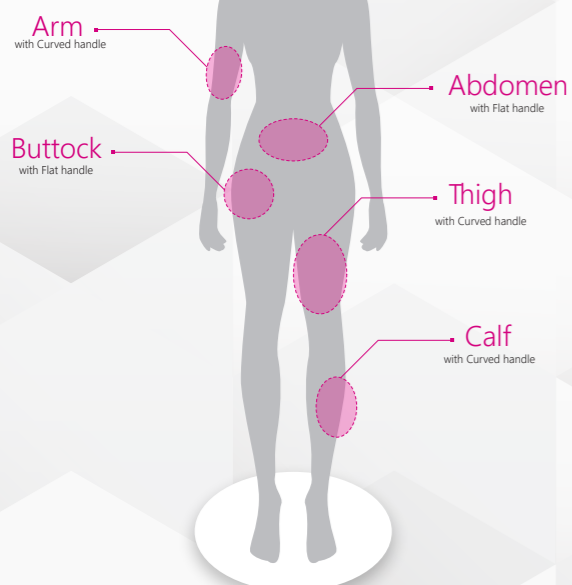

Orchestra Max does not cause pain or discomfort. The Orchestra Max procedure feels like an intensive workout, as your muscles are undergoing a vigorous series of contractions every few minutes for a total of 30 minutes. There is also a prickling sensation during the treatment.
